

Vladimir LAPIN, Ph.D.

Senior Research Engineer | Climate Scientist | Applied Mathematician

PERSONAL DATA

NATIONALITY: Russian | Authorized to work in the EU (Permanent Resident – Spain)
LOCATION: Barcelona Supercomputing Center, Barcelona, Spain
CONTACT: vladimir.lapin@bsc.es | +34 611 474 420
PROFILES: [Website](#) | [GitHub](#) | [LinkedIn](#) | [Google Scholar](#) | [ORCID](#)

PROFILE SUMMARY

- **Senior Climate Modeller:** Applied Mathematician (1st Honours, MSU) with 15 years in climate model development, scientific computing, data assimilation, and numerical methods.
- **HPC Workflows & AI Adoption:** Co-lead for Auto-EC-Earth4 ensemble workflows; leading group-wide AI adoption to transform scientific workflow development and automated verification.
- **Consortia:** Co-maintainer of EC-Earth4 across 30 European institutes; contributing to DCPD decadal prediction and international climate modelling efforts.

EMPLOYMENT

2025 – now	Senior Research Engineer, Earth Sci. Dept., BSC, Spain
ROLE	◦ Model Development: Co-leading development of EC-Earth4; co-lead for Auto-EC-Earth4, the Autosubmit-based ensemble workflow layer for BSC's CMIP7 and WMO production runs. ◦ Consortia: Co-maintainer of the EC-Earth4 model repository across 30 institutes in 12 European countries; integration standards, CI, and release coordination. ◦ HPC & AI Adoption: Architecting and operating reproducible ensemble workflows on HPC clusters (Autosubmit/Slurm); leading AI adoption across the research group; contributing to decadal prediction systems (DCPD).
2019 – 2024	Recognized Research Engineer, Earth Sci. Dept., BSC, Spain
ROLE	◦ Model Development & Data Assimilation: Development of EC-Earth3; designed and implemented a nudging scheme for sea-ice state estimation; maintained assimilation pipelines for ocean and atmosphere components. ◦ Ensemble Systems: Built high-throughput ensemble prediction systems (50–100 SYPD, 10s–100s of members) for decadal climate variability studies.
2015 – 2017	Postdoctoral Scientist, Ocean Dept., MPI-M, Germany
ROLE	◦ Sea-ice Modelling: Developed the sea-ice component of the ICON climate model, focusing on numerical stability, algorithm efficiency and physical realism.
2011 – 2014	Research Fellow, Applied Math Dept., Univ. of Leeds, UK
ROLE	◦ Numerical Modelling: Developed high-resolution global numerical models for ocean tides (shallow water equations), implementing an improved finite difference scheme. ◦ Parallel Computing: Investigated multi-scale internal tide generation over rough topography using parallel computing (domain decomposition). ◦ Data Analysis: Performed extensive data analysis and visualization of global model outputs in MATLAB. ◦ Teaching: Teaching Assistant for Calculus of Variations, Calculus & Mathematical Analysis, and Modelling with Differential Equations.
SUM 2008	Risk Analyst (Intern), Raiffeisenbank, Russia
ROLE	◦ Data Analysis: Portfolio risk diagnostics, quantitative metric tracking, and preparation of operational risk reports.

SUM 2007 **Junior Statistician**, [ACNielsen](#), [Russia](#)
ROLE ○ **Statistics:** Statistical analysis of retail consumer purchase data and anomaly detection in store audit datasets.

SKILLS

MODELS	Ocean/climate/fluid dynamics, numerical model development, PDEs, data assimilation
CODE	Python, C/C++, FORTRAN (MPI, OPENMP), GIT, YAML, JSON, MATLAB, COMSOL
DATA	Python (xarray, numpy, pandas), NETCDF, CDO, High-performance Data Pipelines
HPC / AI	Linux/BASH, SLURM, Workflow Engines (AUTOSUBMIT), Agentic Workflows (GH-AW, agent contracts), LMOD/CONDA, CI/CD
CONSORTIA	Co-maintainer of EC-Earth4 across 30 partner institutes; operational release coordination, integration standards, CI/CD, documentation
MENTORING	Supervision of 2 PhD and 3 Master's students; organization of training events
OUTPUT	27 peer-reviewed publications; 21 international presentations

EDUCATION

2008 – 2011 **Ph.D.** in *Applied Mathematics*, [University of Limerick](#), [Ireland](#)
ROLE ○ **Applied Math:** Research in geophysical fluid dynamics and thin-film Stokes flows using asymptotic analysis and numerical modelling (MATLAB, COMSOL).
○ **Teaching:** Teaching Assistant for Engineering Mathematics I/II, Vector Analysis, and Mathematical Modeling and Tutor in the Maths Learning Center.
○ **Thesis:** “Resonant over-reflection of waves by jets in a rotating ocean.”

2003 – 2008 **B.Sc., M.Sc.** in *Applied Mathematics*, [Moscow State University](#), [Russia](#)
○ **Grades:** 4.85/5*, 1st Honours
○ **Thesis:** “On the stability of the plane flows of visco-plastic fluids”

TRAININGS & WORKSHOPS

- 2026 | **ML for Earth System Modeling: the Anemoi Framework**, *BSC AI Factory* (4 days)
Skills: Graph Neural Networks, Data-Driven Weather Prediction, Anemoi, PyTorch
Reinforcement Learning, *BSC AI Factory* (4 days)
Skills: Q-Learning, Policy Gradients, Stable Baselines3, Gymnasium
Advanced HPC training, *ECMWF* (4 days)
Skills: Parallel Computing, MPI, SLURM, Lustre, Profiling (MAP/Darshan), Debugging (DDT)
Fundamentals of Deep Learning, *BSC AI Factory* (1 day)
Skills: Neural Networks, Computer Vision, PyTorch
Industrial Computational Fluids Dynamics, *BSC AI Factory* (3 days)
Skills: CFD, OpenFOAM, HPC for Engineering
EPICURE High Scalability Workshop, *EPICURE* (3 days)
Skills: MPI, OpenMP, Performance Analysis, MareNostrum 5
Generative and Self-Supervised ML, *BSC AI Factory* (4 days)
Skills: GANs, Transformers, Self-Supervised Learning
- 2022 | **Data assimilation**, *ECMWF* (5 days)
Skills: 4D-Var, Ensemble Methods, Numerical Weather Prediction
- 2019 | **Data Assimilation in Geophysics**, *University of the Balearic Islands (UiB)* (5 sessions)
Skills: Data Assimilation, Geophysical Fluid Dynamics, Ensemble Kalman Filters
- 2017 | **Energy transfers in Atmosphere and Ocean**, *University of Hamburg*
Skills: Atmospheric Dynamics, Ocean Dynamics, Turbulence
- 2016 | **ICON developer meeting**, *Löwenstein*
Skills: ICON Model, Fortran, Unstructured Grids
3D Visualization with ParaView, *DKRZ*
Skills: ParaView, VTK, Scientific Visualization
- 2015 | **9th Earth System Modeling School**, *MPI-M*
Skills: ESM Couplers, Climate Dynamics, HPC Infrastructure
Energy transfers in Atmosphere and Ocean, *University of Hamburg*
Skills: Wave-Flow Interactions, Energy Cascades
- 2014 | **ESGI 100**, *University of Oxford*
Skills: Industrial Mathematics, Mathematical Modelling, Problem Solving
The Dynamics of Rotating Fluids Meeting, *UCL*
Skills: Rotating Fluids, Geophysical Fluid Dynamics
- 2013 | **3rd DNVA-RSE Norway-Scotland Waves Symposium**, *Oslo*
Skills: Wave Dynamics, Internal Tides
- 2012 | **Nonlinear Waves in Fluids**, *Loughborough University*
Skills: Nonlinear Waves, Numerical Methods, Fluid Mechanics
- 2011 | **ESGI 82**, *University of Limerick*
Skills: Applied Mathematics, Optimization
- 2010 | **1st Russian Study Group with Industry**, *Moscow*
Skills: Mathematical Modelling, Industry Collaboration
ESGI 75, *University of Limerick*
Skills: Mathematical Physics, Stochastic Processes
3rd Wave-Flow Interactions Network meeting, *University of St Andrews*
Skills: Wave-Flow Interaction, Geostrophic Flows
- 2009 | **Asymptotic Methods in Fluid Mechanics**, *Udine*
Skills: Asymptotic Analysis, Perturbation Methods
Multiscale and Adaptivity: Modeling, Numerics and Applications, *Cetraro*
Skills: Numerical Analysis, Multiscale Modelling
ESGI 70, *University of Limerick*
Skills: Data Analysis, Mathematical Finance
Nonlinear PDE & Free Boundary Problems, *University of Warwick*
Skills: Partial Differential Equations, Free Boundary Problems
Mathematics of Weather and Climate Prediction, *Met Office*
Skills: Numerical Weather Prediction, Climate Dynamics

PRESENTATIONS, TALKS AND POSTERS

- 2016 | **ICON winter meeting**, *DWD*, “Sea Ice in ICON”, Offenbach am Main
- 2015 | **Ocean seminar**, *MPI-M*, “Sea Ice in ICON”, Hamburg
- 2014 | **NOC seminars**, “A global finite-difference model for surface and internal tides”, Liverpool
ClimathNet 2014, “Accuracy of finite-difference ocean models with staircased boundaries”, University of Leeds

	EGU2014, “ Global modelling of surface and internal tides ”, Vienna
	Applied Mathematics seminars , “Global modelling of surface and internal tides”, University of Leeds
	Applied seminars , “Numerical modelling of surface and internal tides”, University of Birmingham
2013	MACSI seminars , “Numerical modelling of tides”, University of Limerick
	19th Conference on Atmospheric and Oceanic Fluid Dynamics of the AMS , “ Global modelling of surface and internal tides ”, Rhode Island
	The British Applied Mathematics Colloquium , “Challenges in global modelling of ocean tide”, University of Leeds
2012	Isaac Newton Institute , “ PDEs on the sphere ” (poster), Cambridge
	Applied Mathematics seminars , “Rimming and coating flows: examples of problems beyond the lubrication theory”, Keele University
2011	Fluids and MHD seminars , “Shocks in thin film flows and resonant over-reflection of waves in GFD”, University of Leeds
	4th meeting of the Wave-Flow Interactions Network , “ Resonant over-reflection of waves as a marginally stable solution ”, University of Cambridge
	BAMC 2011 , “Shocks in coating flows in a rotating horizontal cylinder”, University of Birmingham
2010	SIAM Conference on Nonlinear Waves , “Shocks in coating flows in a rotating horizontal cylinder”, Philadelphia
	ECMI 2010 , “Shocks in coating flows in a rotating horizontal cylinder”, Bergische Universität
2009	MACSI colloquium , “Radiating instabilities and hyper-reflection of waves by jets in a rotating ocean”, University of Limerick
	2nd Wave-Flow Interactions Network meeting , “2nd Wave-Flow Interactions Network meeting” (poster), Edinburgh
	Workshop University of Bath , “Variational and Topological Methods and Water Waves” (poster)
2008	Lomonosov’s readings , “Spectral stability analysis of the perfectly plastic Couette flow”, Moscow State University

SCHOLARSHIPS AND CERTIFICATES

SEP 2008	SFI PhD Studentship (€18,000)
APR 2008	GRE Subject Test in Mathematics: 830 (92% below)

B.Sc., M.Sc. in APPLIED MATHEMATICS and MECHANICS, 1st Honours

M.Sc. at the Department of **Mechanics of Composites**

COURSE	HOURS PER TERM	GRADE*
Mathematical Analysis I, II, III, IV	144/128/144/96	5/4/5/5
Complex Analysis I, II	72/64	5/5
Functional Analysis I, II	72/64	5/5

Stability Problems in Mechanics of Continua [†]	32	5
Degree Thesis		5
Total Hours and GPA	4866	4.85/5**

* Russian universities implement a [five point grading system](#), where “5” is “Excellent” and “2” is “Fail”.
Some courses are graded on “Pass/Not pass” basis and here “P” stands for “Pass”.

** Equivalent US GPA is 3.88 (when crudely converted to GPA 4.0 scale).

† Indicates an optional course; other courses are part of the compulsory curriculum for the degree.

‡ In the laboratories of the [Institute of Mechanics, MSU](#).
